### Foch in Training for Round of Banquets Here

BREST, Sept. 20.—Marshal Foch, who on October 22 will sail for the United States, has gone into training for the trip to his Brittany estate, a few miles from here. He will stay there for a month getting in condition to meet the rigors of a series of banquets he expects to attend while visiting the United States. The American Legionaries who visited France during the last month made it clear to him that they regarded him as "their marshal" and that record honors and hospitalities would feature the welcome accorded him.

"Poor Marshal Fayolle was on the

corded him.

"Poor Marshal Fayolle was on the verge of dyspepsia when he returned from America," the Marshal is said to have remarked jokingly, "and he has a much better stomach than I. If the Americans insist upon banqueting me as they propose, I am afraid the 'battle of America' will be my undoing."

Thirst-Tortured San Francisco Finds Hope in "Enologist"

Finds Hope in "Enologist"

SAN FRANCISCO, Sept. 20.—A new profession has appeared in San Francisco. An expert "enologist" advertised his services to-day in a local paper for the benefit of heads of families who are entitled under the law to manufacture a maximum of 200 gallons of non-intoxicating wines. An "enologist" is defined as a person thoroughly experienced in the making of wine. His advertisement reads:

"Since the law allows you to make 200 gallons of grapa juice for your own family's use, let an expert enologist make it for you at your residence, avoiding poor results and wasting money. Start now before grapes go too high."

Mingo Operator Tells Probe

Calls State Absolutely Helpless

"You are right," Wiley replied, banging on the table; "they should be carried out by the state, but until the state does it what are the people going to do? The state lies supinely at the feet of the United Mine Workers today. If West Virginia cannot get a constabulary or a National Guard to perpetuate its existence, then it is absolutely helpless."

"You mean the state is controlled by the union?" Sept. 19 (By The Associated Press).—King Constantine, discussing the \$32,000,000 Greek credit in the United States, expressed his belief to-day that Greece was prepared to guarantee that the money would not be spent for war purposes, if such assurance should be required for the release of this credit.

In reply to a suggestion that release might depend also upon the settlement of the question of recognition, Constantine seemed to think it ought to be sufficient for the American government that the Greek Parliament legalized all the obligations entered

Feet' of Union; Terror
Cuts Region's Production

LOGAN, W. Va., Sept. 20.—The State of West Virginia "lies supinely at the feet of the United Mine Workers of America." William F. Wiley, vice-president and general manager of the Boone County Coal Corporation, told a Sente investigating committee here today, in describing conditions in the coal mining region.

Operating a plant in which only union miners are employed, Mr. Wiley declared production had been cut down because of the terrified plight of the workers as a result of recent disturbances. After he had given the committee a word picture of troubles in a two-hour recital, Senator Kenyon touched on the employment of private detectives by operators.

"Aren't you putting certain functions of the government into the hands of private institutions, and could not the state carry them out?" Senator Kenyon asked.

Calls State Absolutely Helpless

There was every sort of anarchist in the mob," he shouted, "and they intended to beat down forces if they could make their own men stand up in the face of bullets from the other side. I was told that miners who deserted were executed; that there were hospital outfits in charge of doctors and nurses, wearing a uniform almost precisely like that of the Red Cross. There was a regular military direction, and they worked in battle array. But I do not believe Federal troops were needed. They could not strip these hills of guns, 5,000 of which are supposed to be in the hollow around my plant in Boone County."

New Location Will Be Fifth Avenue at 56th and 57th Streets

> We had fully intended occupying our new twelve-story building at Fifth Avenue, 56th and 57th Streets, early this Autumn—and all of our commitments, both abroad and at home, had been made accordingly-but, as everyone who has to do with construction and interior work knows, "it is rather an uncertain quantity," and from present indications, it is likely to be some time before we can be fully settled in our new home.

## The money-column a 13th-century invention

In England, about the year 1300, bookkeepers first entered amounts in a separate column. One of the earliest books in which this innovation appears is an "Account of the Royal Wardrobe," a page of which is reproduced here.

In the books used for modern Loose Leaf accounting, one opening of the book provides more than one hundred columns. Expenditures of many departments, each under the proper heading, are entered side by side for quick

Among the business houses that use National Loose Leaf and Bound Books in their accounting departments are such institutions as the Cunard Steamship Company, Ltd., the Fleischmann Company, and the Goldwyn Pictures
